School of Computing and Information Sciences

Course Title: Windows Programming for IT  Date: 3/25/2009

Course Number: COP-4005

Number of Credits: 3

| Subject Area: Application Development | Subject Area Coordinator: Kip Irvine  
|                                     | email: irvinek@cis.fiu.edu |

Catalog Description:
Application development techniques in Windows: Classes, Objects, Controls, Forms and Dialogs, Database, and Multitier Application Architecture. Students cannot receive credit for both COP4005 and COP4226.

Textbook: Starting out with Visual Basic 2008  
Tony Gaddis and Kip Irvine  
Addison-Wesley (Pearson Education)

References:
Visual Basic .NET  
Francisco Balena  
Microsoft Press. ISBN: 0735613753

Prerequisite Courses: COP 3804 or COP 3337

Corequisite Courses: CGS 4366

Type: IT Elective for Application Development area

Prerequisites Topics:
- Object-oriented programming concepts
- File-handling concepts
- Data types, decision patterns, iteration patterns, arrays

Course Outcomes:
1. Master the use of classes and objects in multitier applications
2. Master structured exception handling in programs
3. Master the use of Windows desktop controls
4. Master the use of interactive error trapping techniques
5. Master the use of data-bound controls and database access
6. Master the use of a database application programming interface
7. Be familiar with common user-centered design and user interface engineering principles
8. Be exposed to software testing and test-driven development techniques

### Assessment Plan for the Course & how Data in the Course are used to assess Program Outcomes

Student and Instructor Course Outcome Surveys are administered at the conclusion of each offering, and are evaluated as described in the School’s Assessment Plan: [http://www.cis.fiu.edu/programs/undergrad/it/assessment/]()

Problem Analysis Experiences

1. 

Solution Design Experiences

1. Reading a problem description and designing an appropriate database schema, user interface, and class relationships.

2. Design a testing plan for an application.
