

# **16<sup>th</sup> International Conference on Web Information Systems Engineering (WISE 2015)**

<http://www.cis.fiu.edu/wise2015/>

## **Call for Tutorials**

Web Information System Engineering (WISE) Conference has established itself as a leading international conference on research, development and applications of Web technologies, methodologies, and applications. By promoting novel, high quality research findings, and innovative solutions to challenging Web issues, the conference seeks to contribute to the advancements of web technologies. The 16th edition of WISE 2015 (WISE'15) is planned to be a leading forum for presentation of original research results, as well as exchange and dissemination of innovative, practical development experiences, covering all aspects of web technologies, methodologies, and applications. In addition to its traditional scope of topics, WISE'15 aims at drawing researchers and application developers from a wide range of Web technology related areas such as Advanced application of databases, Web mining and knowledge discovery, Cloud computing, Information retrieval, Web-based collaboration, Workflow and E-services.

This CFP is to solicit from active researchers and experienced tutors on web technologies and applications tutorial proposals. Ideally, a tutorial will cover the state-of-the-art research, development and applications in a specific web technology direction, and stimulate discussions and facilitate future work. A tutorial should be built by drawing information the previous work of the presenters as well as the relevant work in the subject area. Tutorial proposals on interdisciplinary directions, novel approaches, rapidly growing areas, and /or significant applications are highly encouraged.

WISE'15 plans to host short and long tutorials. They will be part of the main conference technical program and will be available to the attendees of the technical program free of charge.

A tutorial proposal should be formatted in the following sections:

- Title
- Abstract (up to 150 words)
- Overview of the topic covered, including the reasons that the topic is interesting and important to the Web community at large
- Content details: A bullet list of organization of the tutorial, in the order of presentation with estimated presentation time for each item (no more than one page)

- Short bios of the presenters including their expertise related to the tutorial (no more than 100 words per presenter)
- Preferred length of the tutorial: short (1.5-3 hours) or long (3-6 hours). If the tutorial can be configured to both a short one and a long one, indicate which part will be exclusively for the long version
- A list of up to 20 most important references to be covered in the tutorial
- (Optional) If the presenters have given similar tutorials before and if the materials for them are available on the web, links to them
- (Optimal) Any specific audio/video/computer requirements for the tutorial

Proposals should be submitted via email to: [wise2015tutorial@gmail.com](mailto:wise2015tutorial@gmail.com). The submission deadline is May 20, 2015 (11:00pm PST). Notifications will be made by June 16, 2015.
