School of Computing and Information Sciences

Course Title: Unix System Administration

Course Number: COP 4343

Number of Credits: 3

Subject Area: System

Subject Area Coordinator:
Nagarajan Prabakar
email: prabu@cs.fiu.edu

Catalog Description:
Techniques of Unix system administration: system configuration and management; user setup, management and accounting; software installation and configuration; network setup, configuration and management.

Prerequisites Courses: COP 3344

Corequisites Courses: None

Type: Elective

Prerequisites Topics:
- Use of Linux system
- Shell programming basics
- GUI familiarity

Course Outcomes:

1. Be familiar with Unix and Linux operating system distributions
2. Master the techniques to perform a Linux installation and customization
3. Be familiar with Unix administration concepts
4. Master the techniques of user setup and maintenance
5. Master the techniques of system operation
6. Be familiar with Unix client network services
7. Be familiar with Unix server network services
8. Master the techniques of Linux e-commerce server setup and administration

Unix System Administration

**Outline**

<table>
<thead>
<tr>
<th>Topic</th>
<th>Number of Lecture Hours</th>
<th>Outcome</th>
</tr>
</thead>
</table>
| • Introduction to Linux Admin  
  o Linux Structure  
  o Distributions  
  o Hardware inventory | 3 | 1 |
| • Installation  
  o Planning a system  
  o Components of system  
  o Installation sources  
  o Installation process  
  o Basic setup: time, network, root  
  o Installing initial software packages | 6 | 2 |
| • The System Administrator  
  o Basic tasks  
  o Ethical aspects  
  o User setup  
  o Preparing for emergencies | 6 | 3,4 |
| • Kernel Configuration  
  o Preparing kernel sources  
  o Compilation steps  
  o Boot sector update | 6 | 2,5 |
| • Advanced Administrator Tasks  
  o Backup strategies  
  o Backup procedures  
  o Software installation  
  o Software updates | 6 | 4,8 |
| • Network services  
  o Basic network configuration  
  o Configuring client services  
  o Printing in Linux | 6 | 6 |
| • E-Commerce services  
  o Web server  
  o Network file system  
  o Mail servers and related utilities  
  o Directory services | 9 | 7 |
Course Outcomes Emphasized in Laboratory Projects / Assignments

Problem Analysis Experiences
1. Hardware Element Inventory

Solution Design Experiences
1. Planning system installation
